Course Outline

Techniques of accident and incident investigation

- The difference between an accident and incident
- Describing the generally accepted hierarchy of how incidents lead to accidents
- The basic process of accident and incident investigation
- Examples explaining the interrelationship of accidents and incidents giving the typical statistical model of how incidents eventually lead to accidents;
- The legal requirements regarding the need to investigate and report on all accidents and incidents;
- The criteria for effective accident and incident investigation.

Practical Activities for submission after class training OR after theory has been completed online:

Facilitate a process using a range of incident investigation techniques to determine the root causes or failures of controls and recommend corrective actions to prevent future incidents and complete the reports
